

Name: _____

Introduction to rocks

Task A: Rock is a natural material

1. Research how we get rocks from Earth.

You might use books or the internet to help you.

Use drawings or photographs to create a 'comic strip' to show each stage of quarrying the natural rock from the ground.

Include these words: **rock, natural, quarry, dig, ground, material.**

Task A: Rock is a natural material

2. Sofia is wondering if all rocks are natural materials.

Sofia

I thought some rocks are made by humans. My dad works in a factory that makes concrete and tarmac and these are kinds of rocks aren't they?

tarmac

concrete

Talk to a partner about what you think.

Task B: Using rock

Go on a rock hunt around your school and local area.

Look for rocks being used for different purposes.

Try to record what you observe as natural rock or human-made material.

You could take photographs of rocks using a camera or draw some of the places you see different rocks.

How was the material being used?	Natural rock	Human-made material
